

Amendments to the Specification:

Please replace paragraph [0062] with the following rewritten paragraph:

[0062] The method can be implemented as a computer program product which is installed in a host computer and which encodes a computer process for testing radio network data connections. The computer process concerned is similar to the method described above. The computer program product may be stored in a computer program distribution medium. The computer program distribution medium is readable by the host computer. The distribution medium may be any prior art medium for distributing a computer program from the producer/seller to the end user. For example, the distribution medium may be a medium readable by a data processing device, a program storage medium or a storage medium, a memory readable by a data processing device or a software distribution package, ~~or a signal understood by a data processing device, a telecommunication signal~~ or a compressed software package.
